[Ask a question about this product](#)

This receiver is an active amplifier. It receives signals from unshielded twisted pair cables and outputs an amplified signal via BNC connector to a monitor (not included). Receives color/monochrome signals and amplifies them for output to a monitor. Interference filtering. Terminal block connector. Adjustable brightness control. LED indicators for power and video signal. Video output: 1Vp-p @ 75 ohms impedance (BNC). Adjustable gain switch. Maximum distance: 2400 meters b/w signal, 1500 meters color (1.49 miles / .93 miles respectively). Power: 24VAC/12VDC (12VDC transformer included). Compact size, can be screwed down (hardware included). For additional distance you can pair this item with an active transmitter (ECL-BTT).
