This high definition outdoor dome IP camera is ONVIF compliant and has it's own automatic infrared array capable of lighting up the dark to a range of 30' or more (depending on the environment). Constructed of tough, hardened aluminum alloy and a tough dome, this product can withstand an attack and keep on providing video. But few trespassers ever go that far dut to a bright white LED strobe on the front of the camera. This strobing light fires every 2 seconds and tells you, or the trespasser, that the camera is there and it is ready for recording anyone in range. (This deterrent LED can be turned off by the user.) 1/4" 1-Megapixel CMOS video sensor High definition video output at 30fps (720p, 1280x720) H264, JPEG, MPEG4 compression 128M RAM 16M Flash ARM 9, 32-BIT RISC CPU Trigger to eMail, FTP, save to SD, SAMBA CBR, VBR bitrate adjustments Full screen monitoring 2-way audio support Internal infrared array Anti-vandal/anti-tamper construction Hardware reset button Remote firmware upgrade support Triple streaming Image snapshot Micro SD card support Privacy mask Pre/Post Alarm AVI, JPEG recording Delete files support Video playback support Motion detect Password: Admin and User 3-axis internal bracket Power: 12VDC (sold separately)
